Figure 1 is a line graph showing the change in the average number of eggs per female (N) over time (t) for the 1980-1981 season. The x-axis is labeled t and has markers at 50, 100, 150, and 300. The y-axis is labeled N and has a marker at 100. The graph shows a step-like increase in N over time, starting from approximately 50 and reaching about 150 by $t=300$.
